PHASE 1: ROOF REPLACEMENT

Over the past several years we have experienced several leaks from the 3 Roof sections of the community center: main roof over gym, roof over kitchen/landing and roof over vestibule. Although several repairs have been made, the life span and present condition of the roof(s) will require total replacement in the near future.

For your reference, the main roof is 5,000 square feet, and requires the full replacement of the roofing material, insulation and possible decking repair. The estimated cost for the total project is over **$100,000.00**. Before we begin any upgrades to the interior of the building it is critical that the roofing replacement be completed first.

Help us protect our church for generations to come!
